Professional Summary

Frontend Developer with professional experience since 2022 using React and Next.js. I am passionate about building interfaces that solve real problems and deliver value to the people who use them. I work with designers and clients to improve the user experience, with additional experience in backend, mobile development, and deployment.

Professional experience

● House of CB

Full Stack Developer | May 2024 - Present

● E-commerce and internal tools

- Reorganized the frontend architecture and established a more maintainable structure, creating reusable components and responsive interfaces with React and Tailwind CSS while incorporating UX improvements.
- Migrated the e-commerce platform to Next.js 14, improving performance by 30%. The platform serves an average of 2,000 users per hour.
- Built internal tools for multiple departments, automating manual tasks to save staff time.
- Manage production deployments and updates with Docker. I share frontend technical decisions and planning, and mentored new team members during onboarding.
- Built server-side features in Next.js with direct SQL access and collaborated with the backend team on PHP and staging tasks.

● Mobile application and dashboard | *Project for another business owned by my contractor*

- Independently developed a bar app with React Native and Expo and managed the entire publishing process for the App Store and Google Play.
- The project includes a dashboard for managing notifications, events, and content, tracking users and purchases, and running a points-based loyalty program.

● 25Watts

Frontend Developer | Oct 2022 - Apr 2024

- Built portfolios, e-commerce sites, blogs and landing pages with WordPress, React and Next.js.
- Implemented features and API integrations, focusing on performance and code quality. Worked with Scrum and Git version control.

Freelance experience

● Strongwood

Freelance Full Stack Developer

● Website | Apr 2023 - Sep 2023

- Built the furniture manufacturer's website with Next.js and React. Defined the architecture, designed the UI/UX and agreed on requirements and deliverables with the client.

● ERP and CRM system | Nov 2025 - Present

- Digitized the factory's operations through a multi-user application that the team uses daily to centralize production traceability and review metrics by area for decision-making.
- Integrated customer and financial management: projected and actual expenses, incoming and outgoing payments, and payroll.
- Gathered requirements with the client and managed deployment. Continue adding improvements based on the team's needs.

● Website redesign | May 2026 - Jun 2026

- Implemented the website redesign, working with the designer and client from requirements through deployment.

● Donatella

Freelance Full Stack Developer | Jan 2026 - May 2026

- Built a multi-user internal tool for a dress sales and rental business, integrating invoicing through Argentina's tax authority, ARCA, customer management, invoice history, and automatic email delivery.
- Managed deployment, domain and email setup, and client onboarding.

Education

Henry Bootcamp

Full Stack Developer | Mar 2022 - Aug 2022

Completed 700+ hours of intensive Full Stack development training with Scrum. Built an individual SPA and a team e-commerce project.
