Professional Summary

Frontend Developer with experience since 2022 in React and Next.js. I build responsive interfaces and reusable components, and improve application performance. I work with designers and clients to make applications easy to use, with additional experience in backend, mobile development and deployment.

Professional experience

● Full Stack Developer

House of CB - May 2024 - Present

- Reorganized the project and built reusable components and responsive interfaces with React and Tailwind CSS, incorporating UX improvements.
- Migrated the e-commerce platform to Next.js 14, improving performance by 30%. The platform serves over 3,000 users per hour.
- Share frontend technical decisions and planning with another developer. Mentored new team members during onboarding.
- Collaborated with the PHP backend team on email templates and staging. Currently migrating functionality to the Next.js server with direct SQL database access to reduce response times.
- Built web applications and internal tools for different departments, automating manual tasks to save staff time.
- Manage production deployments and updates with Docker.
- Independently developed a bar app with React Native and Expo for another business owned by the person who contracts me, including setup for publication on the App Store and Google Play.
- The project includes a dashboard to manage notifications, events and app content, track users and purchases, and run a points-based loyalty program.

● Frontend Developer

25Watts - Oct 2022 - Apr 2024

- Built portfolios, e-commerce sites, blogs and landing pages with WordPress, React and Next.js.
- Implemented features and API integrations, focusing on performance and code quality. Worked with Scrum and Git version control.

Freelance experience

● Strongwood

Freelance Full Stack Developer

- **Original company website** | *Apr 2023 - Sep 2023*
 - Built the furniture manufacturer's website with Next.js and React. Defined the architecture, designed the UI/UX and agreed on requirements and deliverables with the client.
- **ERP and CRM system** | *Nov 2025 - Present*
 - Designed and built interfaces and workflows for a multi-user application based on factory processes, with production traceability and metrics by area to support decision-making.
 - Integrated customer and financial management: projected and actual expenses, incoming and outgoing payments, and payroll.
 - Gathered requirements with the client and managed deployment. Continue adding improvements based on the team's needs.
- **Website redesign** | *May 2026 - Jun 2026*
 - Implemented the website redesign, working with the designer and client from requirements through deployment.

● Donatella

Freelance Full Stack Developer | 4-month development project

- Built a multi-user tool for a dress sales and rental business: ARCA tax authority integration for invoicing, customer management, invoice history and automatic invoice emails.
- Managed deployment, domain and email setup, and client onboarding.

Education

Henry Bootcamp · Full Stack Development | Mar 2022 - Aug 2022. 700+ hours of frontend and backend training. Built an individual SPA and a team e-commerce project using Scrum.
